

Winman CA ERP New features AY 2012-13

Dear member of Winman family,

Warm greetings from Winman!

It is our pleasure to release the version 12.1, incorporating **A.Y. 2012-2013 updated with all the applicable amendments including revised Schedule VI** requirements and the following exciting features.

Facility to lock the file on Finalisation

Now onwards, if the tax file is finalised and return is filed, it will be locked and any subsequent changes for the file will not be allowed unless the file is unlocked. When the paper return is generated for a file, the pop-up window with the option for finalising the file will appear. Further, if e-return is generated and uploaded, the file will be finalised automatically. You can also finalise the file by clicking the picture  in the menu bar or go to the 'Tools' menu → 'Finalise the file'.

Summary of the changes made after unlocking the file will be recorded and saved in the file for your reference. To view the same, go to 'View' menu → 'Changes Summary'.

Undo and Redo facility

Facility is given to use the undo and redo actions in the Computation and other windows by clicking the picture  and  in the menu bar.

Please do send your feedback.

With warm regards

For Winman Software (P.) Ltd.

General Manager (Service)
