System Requirements for Winman CA-ERP Server Edition

Winman CA-ERP Server Edition license will be installed on a server computer.

The software can be accessed by clients over LAN or Terminal Services (Like Remote Desktop, Thin Client etc.). Any client machine which is connected to same LAN where the server resides can access the software through network share without installing the software locally on client machine.

The software uses file system for data storage. All the data entered in the software will be saved in '.tax' files similar to MS Word & Excel. In server edition license, you can configure the software to use any local folder or a separate storage server to store the data files. All the data saved by all clients will be stored in this common data path. You cannot use separate data path for each client in the server edition.

Hardware/ Software requirements for server computer

Winman CA-ERP does not require any dedicated server for both application as well as data. You can use any of your existing servers.

COMPONENT	REQUIREMENT
Processor	Intel Pentium 1.8 GHz or above Intel Xeon 1.5 GHz or above (If users are more than 10)
RAM	3GB or above
Hard Disk space	1.5GB for installation and additional storage for data depending on number of files (Average size of a file will be around 1MB)
Operating system	Windows 7 or above* Windows Server 2008 or above*
Network (LAN)	100Mbps or above (With internet connectivity for auto updates)

Note: If more than 10 simultaneous users are using the software, following configuration is needed

Additional software	SQL server 2008 R2 SP2 or above (Any edition) Around 10 Databases will be created in this SQL server. All the software users should have full permission to this SQL server. For SQL server system requirements, refer: http://msdn.microsoft.com/en-us/library/ms143506(v=sql.105).aspx#SSE_x64

*__Note__: Different OS has different maximum allowed concurrent connections. See the below table for installing the CA-ERP server edition in proper OS as per your requirements.

Operating System	Maximum allowed concurrent connections from network
Windows 7/8/8.1 Home	10
Windows 7/8/8.1/10 Professional/Ultimate/Enterprise	20
Windows Server	Unlimited

Hardware/ Software requirements for client computer

Winman CA-ERP does not have any special system requirements. It works in all the PCs where MS excel and MS word works.

COMPONENT	REQUIREMENT
Processor	1GHz or above (32 or 64 bit)
RAM	1.0GB or above
Hard disk	100MB for installation
Display and graphics	With resolution 1024x768 or above
Operating system	Windows 7 or above
Browser	Internet Explorer 9 or above
Microsoft .Net Framework	4.0 or above
Network (LAN)	100Mbps or above network connectivity speed between server and client (Internet connectivity is required for accessing online features such as PAN validation, e-filing, Query Manager etc.)
Additional software	Certain advanced functionalities require MS office 2003 or above (Excel and Word), Adobe reader 11 or above, Java 8 update 66.
